

The easiest and most affordable way to add aeration and drying to your bin.

Manhole Aeration offers a simple and cost-effective solution for adding aeration to hopper-bottom bins. Just install Wavcor's Manhole Aeration Cylinder, connect it to either Wavcor's Airblast fan or another brand of fan, and, if desired, attach a heater for drying capabilities. No modifications to the bin are needed.

- Smooth wall or corrugated bins
- Uses the existing manhole
- Bin can be entered by removing 4 bolts
