

The easiest and most affordable way to add aeration and drying to your bin.

Manhole Aeration offers a simple and cost-effective solution for adding aeration to hopper-bottom bins. Just install Wavcor's Manhole Aeration Cylinder and connect it to either Wavcor's Airblast fan or another brand of fan using an air sock. No modifications to the bin are needed and the bin can be easily entered by removing 4 bolts.

- Smooth wall or corrugated bins
- Uses the existing manhole
- Bin can be entered by removing 4 bolts
- Can be used with 3hp to 20hp+ fans
- Will deliver airflows of up to 3000 cfm
(when paired with 20hp fan)
